## Headquarters for the Finest COMMERCIAL CUT-FLOWER DAHLIAS

We have been able to develop the largest commercial Dahlia business in this country mainly because we refuse to promote or recommend any variety that has not actually made good in a commercial way right here in the New York wholesale cut flower market.

With the hundreds of varieties that are yearly being added to a list that is already much too extensive, it is becoming more difficult for the commercial grower, desirous of having the best, to make a selection without wasting much money and time in trying out a great many new kinds that turn out to be worthless for the purpose intended.

Don't throw away money and valuable time experimenting—we have done that for you. Buy from this list and be sure.

## for Forcing and Outdoor Planting

With the introduction into commercial channels of some beautiful new kinds and with the elimination of thrip by all careful growers, Gladiolus have resumed their place as our most popular Summer cut flower. FOR BULK BULBS

Flowering Bulbs in themselves convey no impression in the customers' minds as to what they will produce and usually it is essential that the display of each variety be accompanied with an illustration showing exactly what the flower is like. This is very important in the sale of dry bulbs and roots over the counter. We have prepared a standard size 5 1/2 x 7 display card for most of the varieties as shown in this list. These cards not only show the flower in natural color, but give the name of each and provide space for pricing. These cards are sent free with each order.
